

EXPERIENCE “THE NEXT BEST”

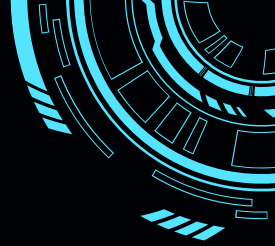

Data Manageability | Data Availability | Data Security

The “Next Best” Business Experience

onQloud is a Technology platform which provides “Next Best” Business experience to all its entities. Embracing world class cutting edge technologies alongside an impeccable support system gives absolute delightment to variety of Partners/customers coming from different verticals and industries . Built on the “PRECOVER(Prevention & Recovery)” approach our Ecosystem protect data 360 degree negating any chances of failure or data loss.

The Three Pillars of Effective Data Management :

01

Data Manageability

Streamlined processes for organizing, storing, and retrieving information efficiently across your organization's ecosystem. Our solutions ensure your data infrastructure supports both day-to-day operations and long-term strategic goals.

02

Data Security

Robust protection mechanisms safeguarding sensitive information from unauthorized access, breaches, and emerging threats. We implement multi-layered security protocols that adapt to evolving risk landscapes.

03

Data Availability

Ensuring critical information remains accessible when needed, with redundancy systems preventing costly downtime. Our highavailability architecture maintains business continuity even during unexpected disruptions.

PRECOVER = Prevention + Recovery

Prevention is always better than Recovery. Our Pre-Cover approach works at both prevention and Recovery level leaving minimal of scope of data loss. At times the online threats and attacks are so severe and instant even the preventive walls fails to protect the organization . You need to have a better predictive assessment which further narrow down the possibilities of attacks and intrusion. An instant detection at the time of intrusion help you to respond to attacks efficiently and effectively.

Why Pre-Cover Matters :

- Cyber threats are becoming instant, severe, and unpredictable.
- Even the strongest preventive walls can be breached.
- What matters is how quickly and intelligently you detect and respond.

Prevention :

- Proactive threat monitoring with 24/7 surveillance and early warning systems
- Advanced encryption protocols securing data both in transit and at rest
- Regular security audits identifying vulnerabilities before they can be exploited

Recovery :

- Automated backup solutions with configurable retention policies
- Rapid restoration protocols reducing recovery time objectives (RTOs)
- Business continuity planning ensuring critical functions remain operational

CONSULT

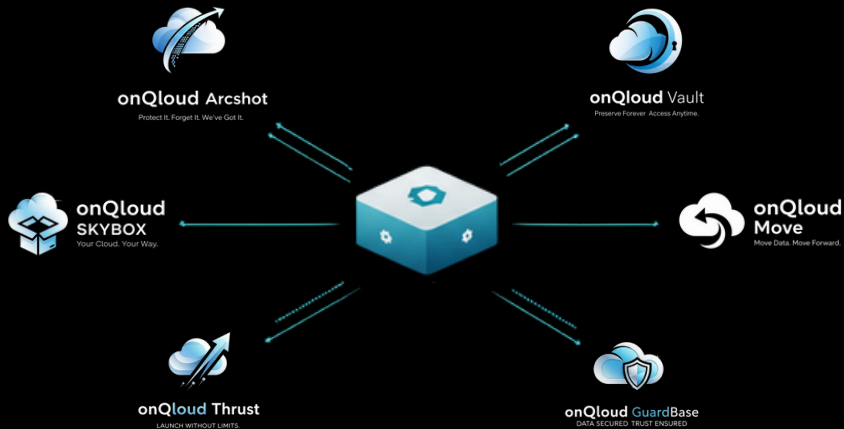

CUSTOMIZE

CO-CREATE

ONQLOUD BACKUP ARCHITECTURE

Data Protection & Recovery

onQcloud Arcshot : Secure hybrid cloud backup for servers, endpoints & SaaS apps

onQcloud Vault : Frozen-in-time archiving for compliance & retention

Cloud Infrastructure

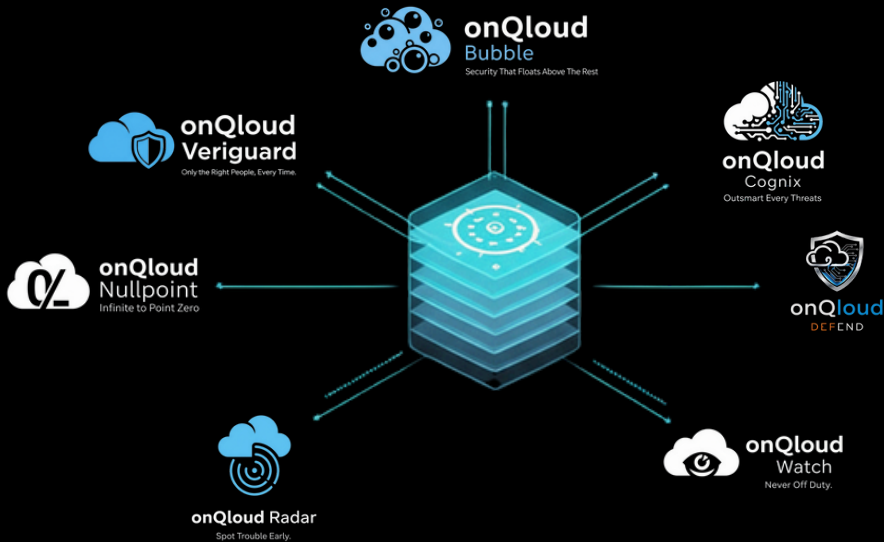

onQcloud Skybox : Safe, agile cloud workspace & storage

onQcloud Thrust : Fast, reliable workload & app launches

onQcloud Guard Base : Dedicated database security

onQcloud Move : Dedicated database security

ONQLOUD SECURITY ARCHITECTURE

Security & Prevention

onQcloud Nullpoint : Extreme Zero Trust security

onQcloud Veriguard : Strict access control

onQcloud Bubble : Isolation shield for workloads

onQcloud Cognix : AI-powered cybersecurity

onQcloud Defend : Detection & response

Managed Services

onQcloud Radar : Early detection of operational & security risks

onQcloud Watch : Round-the-clock managed IT support

WHY ONQLOUD?

12+ Years of Expertise

The group has Proven track record in business continuity across BFSI, Healthcare, Government & Manufacturing.

100% Ransomware Recovery

Every client fully recovered — zero data loss, minimal downtime.

Proactive Security Beyond Backup

Endpoint isolation, application containment & threat virtualization to stop breaches before they happen.

Unified Data Protection

Covers on-prem, hybrid, and cloud (Azure, AWS, GCP, VMware, Hyper-V).

Zero-Touch Network Access Control

Identity-driven access & device hygiene without disrupting operations.

Instant Recovery, Instant Uptime

Recover entire servers & apps in minutes, not days.

Trusted by 200+ Clients in 17+ Countries

From banks to hospitals to government agencies.

Simplified Security & Manageability

One platform to monitor, protect & analyze threats in real-time.

Compliance-Ready

Built-in policy frameworks & audit trails.

Localized Support, Global Standards

UAE & India presence with high-touch regional support.

Customizable & Scalable

Solutions for SMEs, large enterprises, and service providers.
